

Improved physician productivity and enabled better risk capture with IKS Scribble™

Client overview

As part of one of the largest health systems in the nation, this physician-led multi-specialty physician group provides patient-centric care in over 40 clinics with ancillary settings including imaging centers and cancer treatment centers.

Challenge

- Physician burnout due to increasing clinical documentation burden
- Physician productivity post EHR migration and documentation standards for better patient care

Solution

- Identified clinicians based on practice patterns and their willingness to adopt our solution
- Collaborated with health systems and practice management to train these clinicians on leveraging the capabilities of IKS Scribble™ for achieving personalized practice goals
- Ensured continued engagement of each clinician with a dedicated virtual physician partner on clinical documentation and during practice

Impact delivered

9.34%

Average relative value units gained per physician

\$106k

Net gain per physician per year

Results

- Physician started the visit with IKS Scribble™, and engaged more with the patient, not worrying about encounter notes
- Clinically accurate charts were created by IKS Health's physicians and delivered to the clinician the next morning for review
- Improved hierarchical condition categories score per patient by 7.43%

"IKS Scribble™ is a huge lifesaver. It allows me to provide better care to patients."

— Family medicine physician
